Accepted for Bachelor of Science at UCT

"I was accepted at UCT for a Bachelor of Science degree majoring in human anatomy and physiology. Thank you for all the help I received at SWPS that made this possible."

In the beginning of the year I had other plans and was considering doing my post Matric course at Stellenbosch University, however, in the mean time I saw the advertisements at Somerset Mall and that prompted me to find out if there was still places available at SWPS. After my initial meeting with Morne [the principal and maths teacher at the school], it was his passion for the subject as well as his conviction that I would be able to receive an A, which I thought was not possible. After our meeting I was sure that being at Somerset West Private School would give me a greater chance of improving my average in mathematics and physical sciences, specifically as their statistics showed great success rates. I would recommend the Somerset West Private School Post Matric programme to anyone seeking to improve their Matric results because the staff are all approachable, supportive and committed to seeing learners improve. The manner in which the subjects are approached, especially maths removes all stigmas and fears learners may have that prevent them from succeeding as well as all the intervention programmes make it almost impossible for a learner to fail. Throughout the course of the year I saw a major improvement in my results and my confidence in my own ability to succeed improved greatly. My plans for the future are to study medicine and become a doctor. I have applied to study at Stellenbosch University, the University of Cape Town, Free State University and the University of Witwatersrand.

I never thought that a school can change a person so much in one year. I was shattered in the beginning of 2020 when I heard that I was waitlisted at the university of my dreams. It felt like there was no hope. I learnt about SWPS and within a week I was attending my first day. I was really optimistic about the idea of a post Matric and did not really know what it was all about. From the first day all the teachers and staff treated you as if you are able to achieve anything even when none of us believed it. Throughout the year I learned how to believe that I can achieve anything through hard work. Morne's quote "Change the way you look at things, and the things you look at change" allowed me to attempt everything with a different mind set. I would definitely recommend anyone to do a Post Matric at SWPS. It was a life-changing experience for me. I was in an Afrikaans school my whole life and now I choose to work in English. I am going to study BSc at the University of Stellenbosch in 2021 thanks to SWPS. At SWPS, no dreams are out of reach.

SWPS is not just a school, it is a home. At SWPS you will not get your 'normal' school experience. I had to adapt to the new way of schooling when I joined which included having no uniform, to having extra classes after school and being only three learners in some classes. All these aspects made my school experience so much more valuable and I could get the help I needed and deserved on the academic front.

The teachers are top quality and willing to go the extra mile to ensure that the learners achieve their very best even if it means that they have to schedule extra classes on Saturdays to help those who are still not grasping a topic. Due to the small classes, the learners are able to express themselves freely, debate about certain ideas, have class discussions and even ask questions as frequently as they'd like. Coming from a big government school I have never been able to do any of the above so SWPS has really set the bar.

I've been at SWPS for 3 years and these were the best years of my high school experience. I first joined at the beginning of my grade 11 year and I can say with 100% certainty that it was one of the best decisions I have made for myself and my future.

After grade 12, I finally decided what I wanted to study and I needed additional subjects which I did not have in school to be able to qualify. I knew exactly the help I would receive at SWPS and how the school would accommodate my needs if I were to take a gap year to go back to school. Therefore it was an easy decision for me to rejoin SWPS as a post Matric.

I would honestly recommend anyone, especially people struggling academically or wanting to do post Matric to make the decision to join the school. I am sad to say goodbye to the best school I have heard of and experienced, but I am looking forward to seeing what the school achieves in the years to come!

I came to SWPS at the beginning of January struggling to get into any university. From then on I had the privilege of meeting the most dedicated and hard-working teachers and the headmaster that runs the whole operation. There is a high level of commitment that is very rare for everyone involved. From the first day, you are welcomed by friendly staff and amazing groundskeepers, and the day is improved from there forward. SWPS is a school that strives for excellence and that is seen in the amount of time and effort they are willing to put into the student via extra classes and the special 4:30 in the morning Sunday class to secure the fact that they achieve their full potential. It is a school filled with teachers that give 100% of themselves and then some. They give countless additional hours after school to lend a hand to a student in need. Morne Coetzer, the Principal responsible for the outstanding school, is never too busy to sit down and discuss anything that is on your mind, whether a concern or just a simple question he genuinely listens and cares. His presence is felt throughout the school. SWPS has been an amazing opportunity for me to learn how to achieve high standards and prepares you well for your university days ahead. The school provides an environment to make amazing life-long friends and memories that will not be forgotten. I would like to thank Morne for his enthusiasm and dedication in helping me achieve my best for the future. It is highly recommended if you are looking for the best opportunity for your child: this would be the school!

Earlier this year, I was at a very confusing stage of my life, as things didn't go as planned with my Matric results and so I couldn't study what I wanted. A colleague of my mom's recommended SWPS to improve my results, but I knew I was always bad at math and I never thought it would get better so I really wasn't enthusiastic about it.

But on my very first day at SWPS I could actually sit in a math class and get myself to listen because Morne was very patient and explained very thoroughly. From there onwards, I just became more positive.

Everything at SWPS was new for me because it's a different school environment from what I was used to. It's more calm and everyone is very friendly and diverse and what I liked the most is that each and every learner is recognized for their abilities and because of that I've also learned to not set any limits to the things I can achieve in my life. The staff is also the best part of the school, I absolutely love how the Principal, whom I someday even forgot is the Principal, interacted with us and is very approachable! I am very happy to have been a part of the school!

I would highly recommend SWPS for the best education for anyone. Next year I'm going to study law and I'm definitely taking the principles I learnt from Morne with me. Namely, no excuses, aim for As!

I will always be grateful to each and every one I met at SWPS for the beautiful memories and experiences.

Cape Peninsula University of Technology: **BTech Engineering: Mechanical**

Before attending SWPS, I was not a confident student. I struggled with studying subjects like maths and science, despite the fact that I had always dreamed of becoming an engineer. Unfortunately my marks in matric were abysmal and I was sure that my dream of becoming a mechanical engineer was too far out of reach.

But thanks to SWPS, I was able to achieve that dream. I was given a new outlook and a new approach to maths and science by the amazing teachers that I had there. They taught me to not only memorise, but to understand and apply what I have learned. That approach and confidence is what led to my success in my tertiary education where I managed to earn my Bachelor's Degree in Mechanical Engineering Technology from CPUT, as well as my successful career as a mechanical designer for a global power transformer company, SGB-SMIT. I was even confident enough to ask my wife to marry me!

I have often thought back to my days at SWPS and the second chance I was given to achieve my goals. If it were not for the passion and dedication of my teachers there, I do not think I would be as far as I am today. Thanks to them, I have a positive attitude towards maths and science and have been able to encourage other young men and women who are in a similar situation to not be discouraged. If I could go from a 30% in maths to a Bachelor's degree, so can they.
